JAYAPRAKASH LOGANATHAN
Director – Data & Analytics *(Program/Project Management)*

+91 9884821179

pratap.log@gmail.com

Profile Summary:

- An **IT Professional** having ***19 years*** of experience with focus on ***Data, Analytics and AI***
- Experience in multiple domains with focus on ***Life sciences, Retail*** *and* ***MFG***
- Experience in leading large Solution initiatives including building pre build IPs that can be leveraged across Customer Environments.
- Deep e**xpertise in working with Delivery teams in adoption of prebuilt IPs and supporting Sales initiatives and proposals for these IPs**
- Accomplished in leading large Cloud Data Lake engagements and Program managing across ***Data Engineering, Cloud Infrastructure*** *and* ***Business Analysis teams****.*
- Extensive experience in **best practices** across ***Data Engineering*** *and* ***Analytics*** which helped Team to optimize delivery.
- Experience in working with **ETL tools** like Talend
- Extensive experience collaborating with the Developer/Architect community to facilitate the **adoption of prebuilt IPs**.

Key Engagements:

GSK: Notifications data from different source systems for various Plants are being processed in **Azure platform** further stored for the **Qlikview Dashboards** to show the various **Business Insights**.

AMGEN: Implementation of **Research Data Lake** in **AWS** to handle the Single Cell Transcriptomics Data

INFINITE Electronics: Implementation of **Enterprise Data warehouse** platform in Azure (legacy to Modernization), attaining **a cost reduction of 25%**

Work Experience

Director – Data and Analytics *(Program & Project Management) –* ***LTIMindtree*** *(Nov 2021 – till date)*

Senior Solutions/Program/Project Manager – ***Cognizant Technology Solutions*** *(Mar 2014 – Nov 2021)*

Technology/Solutions Lead/Manager – ***Infosys Technologies*** *- (Jul 2004 – Feb 2014)*

Key Solutions:

Started with a small team of trainees, expanded it to a **20+** member team which successfully built various **Advanced Data and Analytics Solutions to serve diverse use cases** across multiple domains.

Vehicle 360 (Telematics Solution in Cloud) – ***CAFÉ, Customer 360 and Fleetmatics***

Cooling System Analytics, Warranty Analytics, SPENDWIZ, OPTILAY

Skills

Domain: ***Life Sciences, Retailing, Manufacturing, Logistics and Energy/Utilities***

Specialization: *Data Engineering/Integration, Data Analytics, Data Quality, Data Intelligence, Data Governance, DataOps, Observability*

Technologies and Tools:

- **Advanced BI and Data Tools**
- **Cloud-Azure, AWS**

Experience Details

Director – Data and Analytics - *LTIMindtree* *(Nov 2021 – till date)*

Program Delivery & Governance

A Program Director responsible for end to end program delivery (*Discovery, Assessment, Program/Project Scoping, Planning (Estimation, Scheduling & Milestones), Quality & KPI Monitoring, Risk management, Communication between project stakeholders, Execution Control and Delivery)*

Infinite Electronics (Enterprise Data warehouse Platform):

- Successfully lead and managed this challenging program of migrating On-Prem SQL Server Data to the **Azure Cloud Platform** including Data component and Report rationalization.
- **Scalable** for multiple brands. Achieved a maintenance **Cost reduction** of **~25%**

Unilever (On Shelf Availability and **Assortment Planning): Analytics Recommendation Engine** implemented with Seasonality factors

Toyota (Report Rationalization): Removing the redundancy in the data and reporting components resulted in almost **20% savings** in effort spent on Support & Maintenance of the critical applications

Solutions

As part of **Solutions Team, played a key role in building** various ***Advanced Data and Analytics Solutions/IPs/Accelerators/Tools*** to automate/accelerate the various processes in Development, Operations and Data Management.

Data Management & Operations: Observability 360, DataOps

Data/Component Migration Solution: **Alcazar** a Development accelerator mainly utilized in **Data Modernization initiatives** (Data Platform Assessment, Analysis, Data Migration, Component Migration) of an Organization to cope up with the Overall Business growth and expansion

Proposed critical **Solutions to the Business/Technical problems** for various large deals and **Solution initiatives**

Senior Solutions/Program/Project Manager- *Cognizant Technology Solutions* *(Mar 2014 –Nov 2021)*

Program Delivery & Governance

Involved in Defining the **End to End Architecture/Platform, Tool/Components Recommendation, Recommendation of Business Insights** for various Use Cases, Project Delivery Management,

GSK:

GMS Quality Dashboard – Notifications data from different source systems for various Plants are being processed in **Azure platform** further stored for the **Qlikview Dashboards** to show the various **Business Insights**.

AMGEN:

LMS Modernization – Upgraded the Learning Management system, to migrate Cognos Reports to Qlikview Reports and hosted these reports on a higher version of sumTotal's application including h DB migration.

Research Data Lake - OMICS & TRANSCRIPTOMICS – Implemented a **Research Data Lake (RDL) in AWS t**o manage the storage and processing of Single-Cell Transcriptomics data, adapted for annotating and registering of Single-Cell Experiments and Samples. This includes changes to dependent applications

TOYOTA:

Service Parts and Accessories: Calculating Installation Rate (IR) for Parts and Accessories, required for regulatory compliance checks, aids business groups in planning, understanding customer preferences and providing Accessory flavors

Solutions

Lead the Solutions team in building the following Solutions in accordance with the industrial use cases

Vehicle 360 (Telematics Solutions)*: *CAFÉ (Corporate Average Fuel Economy), Customer360 and Fleetmatics - Building Analytics solutions on vehicle running data, these Solutions recommend Business decisions to Auto OEMs regarding the Vehicle Model manufacturing and decommissioning, ultimately contributing to increased overall revenue.

Fleetmatics: Implemented for one of the Logistics companies, this solution enables effective tracking of their Fleets, resulting in **~15% overall revenue growth**

***Cooling System Analytics Solutions (Refeer Analytics)*:** An integrated, robust and scalable analytical platform for effectively managing the Cooling System Operations. Through predictive maintenance recommendations, it enhances quality, consistency and efficiency.

Technology/Solutions Lead (BI Reporting & Solutions) – *Infosys Technologies Ltd* *(Jul 2004- Feb 2014)*

Project Delivery & Governance

JC Penney Information Systems., USA - Enhanced Forecasting and Allocation Systems *(EFAS).*

Wal-Mart Stores Inc.(Information Systems Division), USA - Global Time and Attendance for Logistics

American President Lines., - Profitability by Customer *(NOLAMSSP)*

Solutions

Loyalty and Campaign Management Analytics Solution - **Payless Shoes, USA**

Campaign Program Management Analytics Solution- **SEARS, USA**

Social Intelligence *(Customer Analytics under Social networking)* - **Starbucks, USA**

Customer Diagnostics Solutions - **Nordstorm, USA and Staples, USA**

Education

M.B.A (Technology Management) from Anna University (Distance), Chennai

B.E (Electrical & Electronics) from University of Madras, Chennai
